FARIS MUNIR MAHDI

Fullstack Engineer

farismnrrbusiness@gmail.com | Portfolio: https://farismnrr.com | github.com/farismnrr | linkedin.com/in/farismnrr

PROFESSIONAL SUMMARY

Fullstack engineer with 1+ year of production experience on meeting-processing and IoT products. Works across backend services in Node.js, Go, and Python with PostgreSQL and the web and mobile interfaces on top of them, including integration and production troubleshooting inside a cross-functional team.

SKILLS

Languages	Node.js, Go, Python
Backend	NestJS, Hapi, FastAPI, REST, MQTT
Frontend	Nuxt, Vue, Svelte
Data & Infra	PostgreSQL, Redis, Docker, Linux, GitHub Actions, OpenTelemetry

PROFESSIONAL EXPERIENCE

Backend & Fullstack Developer | PT Perkasa Pilar Utama | July 2025 — Present | Jakarta, Indonesia

Develops backend services, client integration, and production operations for meeting-processing and IoT products, with substantial application ownership inside a cross-functional product team spanning AI services, IoT hardware, infrastructure, security, and UI/UX.

Related projects: Sensio Notes: Meeting Intelligence Platform, Sensio IoT: Smart-Space Platform

- Built recording upload and progress-feedback flows for Sensio Notes across web and mobile, including recovery after interrupted uploads.
- Built backend and control-feedback flows for Sensio IoT, connecting user commands to device state, and worked on application reliability.
- Implemented UI/UX designs as working web and mobile features and worked with AI and IoT engineers on integration.
- Diagnosed application failures and supported testing and releases with infrastructure and security engineers.

SELECTED PROJECTS

Masih Awam AI Code: Agentic Coding Workspace | github.com/farismnrr/agentic-ai-code | 2026

Built a coding agent workspace in Nuxt and Rust where the AI proposes file edits and shell commands, and a native Rust relay runs them inside a Bubblewrap sandbox under explicit permission rules. Each action returns its diff, test output, and Git state, so a claimed fix can be checked.

Masih Awam LMS: Game-Based Learning Platform | 2026

Built Rust and Axum services on PostgreSQL for courses, enrollment, and lesson completion, instrumented with OpenTelemetry and Prometheus. Learner progress is stored apart from the game and story layer, so dashboards can show the next lesson while public course pages stay separate from private progress.

IoTNet: IoT Operations Platform | Solo | i-ot.net | 2026

Built an IoT management platform in Node.js with Hapi, PostgreSQL, MQTT, and EMQX. It records requested commands apart from reported device state so the UI shows what was asked versus what the device did, checks device ownership before any control, and traces the command flow with OpenTelemetry.

Multi-Tenant User Management Service | Solo | github.com/farismnrr/Multitenant-User-Management-Service | 2026

Built a reusable authentication service in Rust and Actix-web with PostgreSQL, JWT sessions, and Argon2 password hashing. One account can belong to several tenants with a different role in each; RocksDB caching and Docker packaging support the runtime.

TECHNICAL PROGRAMS

Machine Learning Engineer Track Participant | Coding Camp powered by DBS Foundation | Feb 2025 — July 2025

Related projects: GiziLens: A Team Capstone Around Food Recognition

- Contributed to the application side of the GiziLens team capstone, implementing authentication, sessions, and user APIs around a food-recognition subsystem developed within the team.
- Integrated PostgreSQL and Redis with the Nuxt frontend and containerized services, providing a deployable web application around the team's food-recognition subsystem.

Backend Engineering Participant | Ruang Guru Academy | Feb 2024 — Jun 2024

Related projects: AskIn: AI Workspace

- Worked through backend-focused learning and implementation around application APIs, service integration, data flow, and deployment.

EDUCATION

UPN "Veteran" East Java | Bachelor of Informatics | 2021 — 2025

CERTIFICATIONS

Alibaba Cloud Certified Professional | Alibaba Cloud

BNSP: Junior Web Programmer | LSP UPN Veteran Jawa Timur | Oct 2025

BNSP: IoT Device Engineer | LSP Teknologi Digital | Aug 2026
