FARIS MUNIR MAHDI

Fullstack Engineer

farismnrrbusiness@gmail.com | Portfolio: https://farismnrr.com | github.com/farismnrr | linkedin.com/in/farismnrr

PROFESSIONAL SUMMARY

Fullstack developer with over a year of experience on production meeting-notes and IoT products. Works on features end to end: APIs, web and mobile screens, testing, release, and production fixes.

SKILLS

Languages: Node.js, Go, Python

Backend: NestJS, Fiber, FastAPI

Frontend & Mobile: React, Vue, Svelte, Capacitor

Data & Infra: PostgreSQL, Redis, Docker, Linux, GitHub Actions

PROFESSIONAL EXPERIENCE

Backend & Fullstack Developer | PT Perkasa Pilar Utama | July 2025 — Present | Jakarta, Indonesia

Backend and fullstack developer on Sensio Notes, a meeting assistant, and Sensio IoT, smart-room controls.

- Built the recording and upload flow in Sensio Notes for web and mobile, so users can see what has been saved and pick up after a dropped connection.
- Built the backend for Sensio IoT room controls: a command goes out, the device's real state comes back, and users see what actually happened, even when a device is offline.
- Turned design mockups into working web and mobile screens and connected them to the AI and IoT teams' services.
- Tracked down production issues and helped test and ship releases with the infrastructure and security engineers.

SEO Specialist (Student Trainee) | PT Tradeasia International Indonesia | Jan 2024 — Mar 2024

- Researched search queries, reviewed page structure and technical SEO issues, and used analytics data to decide which pages and topics needed attention.

SELECTED PROJECTS

Sensio Notes: Meeting Intelligence Platform | PT Perkasa Pilar Utama | sensio.id | 2026

A meeting assistant that turns long recordings into summaries, decisions, and action items you can search later. Worked on the capture side, from upload to a finished summary.

AI Workspace for Non-Developers | workspace.masihawam.com | 2026

Open-source AI workspace for non-developers: an orchestrator delegates work to specialist AI roles, and results are accepted only when checks prove them.

TECHNICAL PROGRAMS

Backend Engineering Participant | Ruang Guru Academy | Feb 2024 — Jun 2024

- Completed a backend engineering program covering API design, authentication, databases, testing, and AI integration.

Cloud Computing Cohort | Bangkit Academy | Aug 2023 — Jan 2024

- Built the cloud side of the Parentify capstone with Mobile Development and Machine Learning teammates.

EDUCATION

UPN "Veteran" East Java | Bachelor of Informatics | 2021 — 2025

CERTIFICATIONS

Alibaba Cloud Certified Professional | Alibaba Cloud

BNSP: Junior Web Programmer | LSP UPN Veteran Jawa Timur | Oct 2025

BNSP: IoT Device Engineer | LSP Teknologi Digital | Aug 2026
