FARIS MUNIR MAHDI

Fullstack Engineer

farismnrrbusiness@gmail.com | Portfolio: https://farismnrr.com | github.com/farismnrr | linkedin.com/in/farismnrr

PROFESSIONAL SUMMARY

Fullstack engineer with 1+ year of production experience on meeting-processing and IoT products. Works across backend services in Node.js, Go, and Python with PostgreSQL and the web and mobile interfaces on top of them, including integration and production troubleshooting inside a cross-functional team.

SKILLS

Languages: Node.js, Go, Python

Backend: NestJS, Hapi, FastAPI, Gin, Fiber

Frontend: Nuxt, Vue, Svelte

Data & Infra: PostgreSQL, Redis, Docker, Linux, GitHub Actions, OpenTelemetry

PROFESSIONAL EXPERIENCE

Backend & Fullstack Developer | PT Perkasa Pilar Utama | July 2025 — Present | Jakarta, Indonesia

Backend and fullstack development for meeting-processing and IoT products, in a cross-functional team of AI, IoT hardware, infrastructure, security, and UI/UX engineers.

Related projects: Sensio Notes: Meeting Intelligence Platform, Sensio IoT: Smart-Space Platform

- Built recording upload and progress-feedback flows for Sensio Notes across web and mobile, including recovery after interrupted uploads.
- Built backend and control-feedback flows for Sensio IoT, connecting user commands to device state, and worked on application reliability.
- Implemented UI/UX designs as working web and mobile features and worked with AI and IoT engineers on integration.
- Diagnosed application failures and supported testing and releases with infrastructure and security engineers.

SELECTED PROJECTS

Sensio Notes: Meeting Intelligence Platform | PT Perkasa Pilar Utama | sensio.id | 2026

Meeting product that turns recordings into summaries and action items. Built upload, progress feedback, and recovery after interrupted uploads across web and mobile.

Masih Awam AI Code: AI Workspace for Non-Developers | Solo | github.com/farismnrr/agentic-ai-workspace | 2026

Open-source AI workspace for non-developers: an orchestrator delegates to specialist AI roles, and work is accepted only when checks prove it. Built with Go and Svelte.

TECHNICAL PROGRAMS

Machine Learning Engineer Track Participant | Coding Camp powered by DBS Foundation | Feb 2025 — July 2025

- Contributed to the application side of the GiziLens team capstone, implementing authentication, sessions, and user APIs around a food-recognition subsystem developed within the team.

Backend Engineering Participant | Ruang Guru Academy | Feb 2024 — Jun 2024

- Worked through backend-focused learning and implementation around application APIs, service integration, data flow, and deployment.

EDUCATION

UPN "Veteran" East Java | Bachelor of Informatics | 2021 — 2025

CERTIFICATIONS

Alibaba Cloud Certified Professional | Alibaba Cloud

BNSP: Junior Web Programmer | LSP UPN Veteran Jawa Timur | Oct 2025

BNSP: IoT Device Engineer | LSP Teknologi Digital | Aug 2026
